case study

Cost effective

Cedral Weatherboard can be a cost effective cladding solution without compromising on aesthetics or functionality

Opened in March 2017 the Lakes Care Centre in South Cerney, Cirencester is the perfect example of how Marley Eternit Cedral Weatherboard can work on larger scale projects. The Lakes Care Centre is a 64 room specialist dementia care unit designed to create a homely and tranquil environment to enhance the quality of life of those living at the centre.

When BBS Facades were first approached by the client, they were already certain of their desire to use Marley Eternit Cedral Weatherboard to create a serene environment for those living in the care centre.

The traditional look achieved from using Marley Eternit Cedral Weatherboard was ideal to create the home-like environment the architects were striving for; whilst the mix of grey and white from the Mineral Tones colour range added a modern twist to the traditional. As well as the aesthetic properties that this facade has to offer, Cedral Weatherboard appeals as a low maintenance option compared to traditional timber. BBS Facades Operations Director, Ben Haveron said "The Lakes Care Centre showcases how Marley Eternit Cedral Weatherboard can be a cost effective cladding solution without compromising on aesthetics or functionality."

BBS Facades supplied the planks, the colour matching fixings and fittings including internal and asymmetric corner profiles, colour match screws and touch up paint for use when cutting planks to size. Using colour match accessories can add the finishing touches to a project.

Time was a big factor when completing this project, however, BBS Facades worked tirelessly to ensure all needs would be met; supplying the first phase of materials just two weeks after the order was placed. All further phases were supplied on or ahead of time to ensure there were no delays to the completion of the project.

BBS Facades is one of the UK's leading distributors of external cladding panels and fixing systems. BBS Facades offers personalised fabrication services to suit almost any requirements, with shaping, drilling, bevelling, cutting and finishing to your specification. All panels can be delivered to site in perfect condition by our skilled delivery team. With a wealth of experience BBS Facades are able to assist you on all cladding aspects of your next build. **Contact BBS Facades today for a quote.**
